REPORT OF TEST

February 24, 1984

CLIENT:

Calleia Bros., Inc.
360 Maspeth Avenue
Brooklyn, NY 11211
Attention: Mr. Bob Abrams

NUMBER
68676

SUBJECT:

Four (4) samples submitted by the client and identified as:
100, 101, 102 and 103.

AUTHORIZATION:

Client's letter dated February 7, 1984.

PURPOSE:

Aroclor PCB content in the four submitted.
EP Toxicity (inorganics) in samples 101 and 103.

PROCEDURE:

I. Aroclor PCB

A known amount of each of the submitted samples was dispersed in hexane. Due to the nature of the samples, a sulfuric acid treatment was necessary before injection into the gas chromatograph. Aliquots of each sample were then injected into a gas chromatograph equipped with an electron capture detector. The resulting chromatograms were compared to chromatograms of the following Aroclor standards: A-1254, A-1248, A-1242, A-1232, A-1221 and A1016.

II. EP Toxicity (Inorganics)

A known amount of each sample was analyzed by Atomic Absorption spectroscopy using standard laboratory procedure.

Dear Mr. Riordan,

Enclosed please find application for
treatment or disposal of an Industrial or Hazardous
Waste stream. Also, please find copies of the
Analysis.

Your assistance in this matter would be
greatly appreciated.

If you have any question please don't hesitate to
call.

Very truly yours
Robert A. Albano
